

Dynamics 365 Enterprise Edition Introduction Workshop

The release of the new Microsoft Dynamics 365 for Finance and Operations, Enterprise Edition, brought a generational shift to the ERP world. The infrastructural part of the solution has been completely redesigned. Equally huge are the new possibilities in application development, business process modelling, ISV product usage, integration, workspace interface and security. There are millions of changes, large and small, that require new user and development experience. However, the simplicity and the powerful performance in the application are still its powerful strengths.

Introducing Dynamics 365 Enterprise Edition

The course is intended to give full knowledge of basic features of Dynamics 365 Enterprise Edition. It provides students with the necessary tools and resources to perform general setup tasks in Dynamics 365 Enterprise Edition and ensures understanding how to start working with the product.

Workshop content:

During the 2 days course you will:

- Be introduced with the components that form the core bone of Dynamics 365 Enterprise Edition.
- Go through the standard setup process in Dynamics 365 Enterprise Edition application.
- Be introduced with Interface and Personalization, Task recorder, License configuration, User and Role setup, Numbers sequence, Data management – import and export capabilities, Organization model and Global address book, working with Batch jobs, Documents handling, general reporting capabilities and Office integration.
- Be introduced with basic General Ledger setup tasks.

The training is a mix of presentations, plenum tasks, laboratory works and self-tests.

Recommended attendees: Junior AX Functional consultants and developers. There is only one requirement for you to enter the course: you should be motivated to start working with Dynamics 365 Enterprise Edition!

Workshop outcome: Based on this course, participants will get full and deep knowledge of basic features in Dynamics 365 Enterprise Edition as well as a clear overview of new Dynamics 365 Enterprise Edition concepts and features and gain hands-on experience in solving basic Dynamics 365 Enterprise Edition setup tasks.

“We at 1ClickFactory aim to help you understand possibilities of D365 Enterprise Edition and ensure, that you will be able to deliver quality solutions towards your customers” Agnė Pelanienė, the instructor

Workshop prerequisites: Every participant should have his own Microsoft Dynamics 365 Enterprise Edition fully functional environment.

Get a head start in understanding the benefits of D365 and prepare to upgrade to the new technology!

About the instructor:

The workshop will be delivered by Agnė Pelanienė, who is a devoted Microsoft Dynamics AX consultant with 15 years extensive experience in ERP business. Before joining 1ClickFactory, where she manages Dynamics AX upgrade and development department, Agnė worked for the leading Microsoft Dynamics partners in the Baltics and was in charge of high-volume Microsoft Dynamics AX solutions' implementation projects as a senior consultant as well as Dynamics AX application trainer. As Dynamics AX instructor Agnė is highly valued in the market.
